

NGN: The Universal Hub

With the Next Generation Network (NGN) Universal Hub as a foundation, credit unions are linked to a comprehensive suite of innovative CO-OP products and services that provide access, convenience and connection for members using the most cost-effective, dependable, versatile and secure technology available.

UNIVERSAL HUB

CO-OP My Deposit

Give home banking a whole new meaning. Harnessing check-imaging technology, CO-OP My Deposit gives your members a “branch” right in their own home or office. This fast, accurate and 24/7 deposit-taking service will reduce your labor costs, expand market reach and give you one more advantage over the big banks.

CO-OP Shared Branching

Provide your members with access and convenience like never before. With thousands of locations across the country and around the world, CO-OP Shared Branching allows your members to access their accounts and make transactions from almost anywhere, just like they would at their home branch. Level the playing field against big banks by becoming part of the fourth-largest branching distribution channel in the country.

CO-OP Fast Branch

Deliver everything your members expect at the teller window—except the lines. At the airport, grocery store, hotel, SEG location or even your own lobby, Fast Branch kiosks expand your reach, decrease deposit-taking costs by as much as 50%, reduce both teller line traffic and fraud risk, and simplify day-to-day work by eliminating check sweeps and courier service.

CO-OP Mobile

Keep pace with your members by providing access anywhere. CO-OP Mobile is easy to launch and has been developed to require minimal or no credit union capital investment. It allows your members to make account inquiries and transfers and find CO-OP Network ATMs and CO-OP Shared Branch locations in real time. It's a new generation of financial technology, broadening your appeal to a new generation of members.

CO-OP Member Center

Deliver access and convenience to your members in the form of 24/7 member and lending services. With an array of customizable options to meet your needs, CO-OP Member Center gives you the power to be available to your members without the costs associated with maintaining an in-house call center. In addition, you'll grow lending volume and increase cross-sales revenue.
