Mobile solutions for a market that isn't standing still.

MAINTAIN RELEVANCE • **EXPEDITE IMPLEMENTATION** • **MINIMIZE MANAGEMENT**

CO-OP Mobile gives you the anywhere/anytime banking capabilities indispensable in the competition to serve as a member's primary financial institution. It enables you to offer a leading-edge, custom-branded app tailored to your needs—without the costly and time-consuming complexities involved in developing a solution in-house.

Robust Client Portal back office tools simplify your management tasks. And CO-OP's dependable network technology expedites implementation for credit unions already participating in CO-OP Shared Branching—while introducing others to a new and continuously developing universe of easily accessible, leading-edge products and services.

Top Reasons to Use CO-OP Mobile

1 **Innovation that keeps you relevant** in a rapidly evolving consumer environment

2 **Enhanced functionality** that delivers the access and convenience members want

3 **A tailored solution** that's optimized to meet your specific needs

4 **A custom-branded** interface that reinforces your identity

CO-OP Mobile offers:

- Text banking*

- App Extensions*

- CO-OP Bill Pay*

Is It Right For You?

Credit Union Challenges	CO-OP Mobile Solutions
I need a mobile solution that delivers the advanced functionality members expect.	Extensive standard features complement advanced options that include real-time, person-to-person payments and remote check deposits.
I want to strengthen our identity as a primary financial institution known for leading-edge services.	Leading-edge technology lets you offer an app with features that rival those available from big banks, helping attract and retain members—especially tech-savvy Millennials.
I need to introduce a powerful mobile app quickly and easily, without the expense and development challenges of creating one ourselves.	Implementation is easy and inexpensive, especially if you're already employing CO-OP Connect technology through CO-OP Shared Branch participation.
I want to be able to add advanced features when we're ready.	Current and future optional features can be added at any time to provide members with an enhanced mobile experience.
I want to deliver a superior member experience, while minimizing additional workload on our staff.	Client Portal application provides web-based back office functions that make it easy to efficiently monitor and manage users with services including account access, member lockout, RealPay by CO-OP reporting tools and enrollment troubleshooting.
